A public service message

2019-nCoV

How to protect yourself and others from Corona Virus?

Remember, 98% patients recover from Corona Virus

Every Flu, Fever and Cough is not Corona Virus

Avoid hugging and shaking hands if you have infection

Avoid schools, offices and gatherings if you have flu

Keep distance from infected people

Use tissue paper or cover your mouth with your elbow when you need to cough and sneeze

Wash your hands with soap for 20 seconds at least

Mask cannot protect you from the Corona Virus, cleanliness can

Visit the doctor when you feel fever, cough or difficulty in breathing
